

Smart phone, Smart photos. Beginners. Online.

Tutor: Elena Garcia-Juan

Tutor: Elena Garcia-Juan

Overview:

Photography is bound up in the history of technological innovations, from the invention of the Daguerreotype to the digital revolution. Each new technological breakthrough has shifted the way we see and represent the world photographically.

Through a theme, “The Sunny Season”, given by the tutor, students will practice basic principles of photography, composition and lighting that you can apply to your smartphone/tablet device. Whether you are capturing a landscape, a portrait or a closeup, students will capture the most beautiful aspects of Spring, leading into a little photography competition. You will be encouraged to take part in group discussions throughout the course.

At its heart, mobile photography is about fun. The joy of having a camera available at those moments you want to keep, is what it’s all about.

What will we cover?

To provide an introduction in the use of camera technology and the settings of a camera with a view to applying the skills learnt in your own environment.

Who is this course for?

Beginning Photographers
Intermediate Photographers
Life Long Learners
Travelers and Explorers

What will I achieve?

- 1 To compose and light an image creatively
- 2 To identify and use my smartphone/tablet' camera controls effectively
- 3 To have a better understanding about photography
